

Raymarine®

C Series Function Navigation Displays

Combination Chartplotter, Radar and Echo Sounder Navigation Displays:

C series puts the power or chartplotting, radar and echo sounder into a single display. Completely customizable, the C series are easily transformed into powerful single display navigation system that is both easy to see and easy to use!

- Configure the C series display in any combination of Chartplotter, Radar or Echo Sounder
- Brilliant Daylight Viewable Color Display Technology
- 256 colors
- High Resolution (VGA) 480x640 pixels
- Powerful processor

Intelligent user interface provides easy access to user defined windows and full screen displays

Chartplotter GPS:

Connect the optional Raystar 120 GPS antenna and the C series is transformed into highly accurate GPS charting system.

- 256 colors of high resolution Navionics Gold electronics charts
- Better than 3 meter Satellite Differential GPS accuracy
- Unlimited waypoint, route and track storage with convenient compact flash storage

Radar:

Simply plug in any of Raymarine's high performance Pathfinder radar antennas and the C series is transformed into compact radar

- Auto GST™ fully automatic gain, sea clutter and tune optimizes targets returns
- Optional 2 or 4KW radome antennas and 4KW or 10KW open arrays
- Radar/Chart Overlay

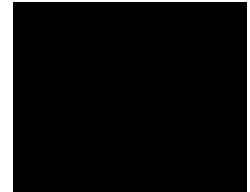

Digital Echo Sounder:

Digital receiver technology allows you to see fish and bottom structure in amazing color discrimination and clarity

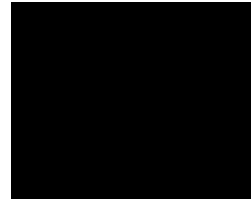

- Optional remotely mounted DSM300 HDFI echo sounder processor
- 600 or 1000 watt operation depending on choice of transducer
- Unmatched HDFI echo sounder performance. Fully adaptive transmitter receiver.

Raymarine®

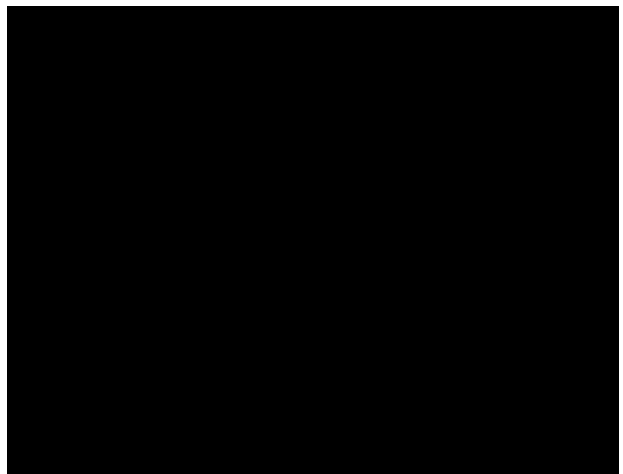

C Series System Pack

The C120 system pack is the perfect starter set for building your Raymarine dream system and includes C120 Multifunction Display, DSM30 HD Digital Sounder Module, Raystar 125 GPS and RayTech Planner at-home planning software. All you need to add is a depth transducer and your system is complete.

The C120 System Pack includes:

- C120 Multifunction Display (C120, owners manual, quick reference guide, full-face suncover, trunnion mounting kit, flush mounting kit, NMEA input/output cable, power cable, and SeaTalk cable.)
- Raystar 125 GPS Sensor (Raystar 125, 10 meter (33') interconnect cable, pole mounting kit, flush mounting kit and instruction manual.)
- DSM30 HD Digital Sounder (DSM30, installation manual, power cable, and 3 meter (10') C-Series interconnect cable.)
- RayTech Planner Software on CD-ROM.

To complete the installation of the DSM30 you will need to purchase a compatible in-hull, thru-hull or transom mount transducer (sold separately.) The C120 System pack is also compatible with Raymarine radome and open-array radar scanners, and the SR50 SIRIUS Satellite Radio and Marine Weather receiver (also sold separately.)
