### A65 GPS Chartplotter

New Raymarine A-Series 6.5" GPS Chartplotter navigation system. The A65 is a compact, yet powerful navigation system that combines simplicity with advanced chartplotting and HD Digital™ fishfinder technology.

**Display Features:**

- 6.5" Sunlight Viewable color display
- High resolution 640 x 480 pixels (VGA)
- Rugged submersible construction (IPX-7 standard)
- Standard yoke mounting bracket
- RS12 12 Channel Satellite Differential GPS receiver (WAAS/EGNOS)
- NMEA 0183 Input and Output
- Plug and Play DSM25 Digital Sounder Module Option

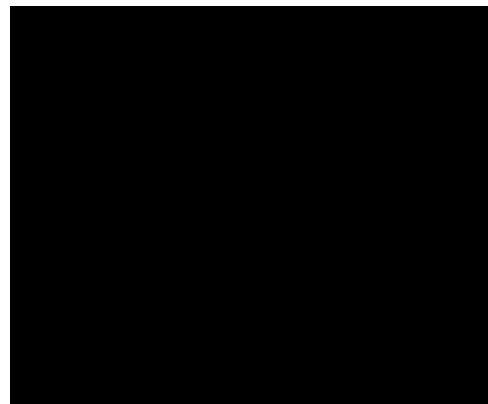

**Chartplotter Features:**

- Ready-to-go Navionics chart coverage for the entire US on a single CompactFlash card (US version only)
- Navionics XL3 Gold chart and Hot Maps compatible
- High speed chart redraw
- 1000 Waypoints and 50 routes with unlimited waypoint and route storage using optional CompactFlash memory card
- Chart Rotation Modes (Head up, Course up and North Up)
- Chart Screen offset for a maximum "look ahead" chart display

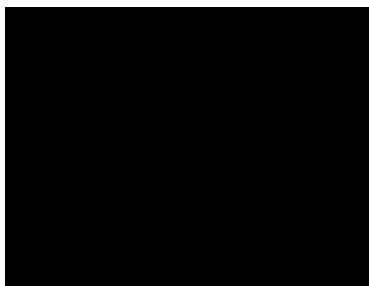

**GPS Chartplotter Supplied Components**

**Part # RAYE33020:**

- A65 Chartplotter Display
- RS12 GPS Sensor with 10 meter cable
- Navionics US Coverage Chart Card (US Models Only)
- Yoke mounting bracket and hardware
- NMEA Input/Output cable
- DC Power cable
- Suncover
- Operation and Installation Handbooks

ORDER NO.	DESCRIPTION	PRICE
RAY E33020	A65 Multichartplotter	\$1649.00
RAY E63070	DSM 25 Digital Sounder Module	\$410.00
RAY E66087	Bronze Thru Hull Transducer	\$259.00

### Raymarine A series Chartplotter-Fishfinder System Packs

**A65 Chartplotter-Fishfinder System Pack** 6.5" Dual Function GPS-Chartplotter with Raystar 12 GPS sensor, DSM 25 Digital Sounder Module, P58 transom Mount Triducer and Navionics Silver Cartography included.

**A60 Chartplotter-Fishfinder System Pack** 5.7" Dual Function GPS-Chartplotter with Raystar 12 GPS sensor, DSM25 Digital Sounder Module, P58 transom Mount Triducer and Navionics Silver Cartography included.

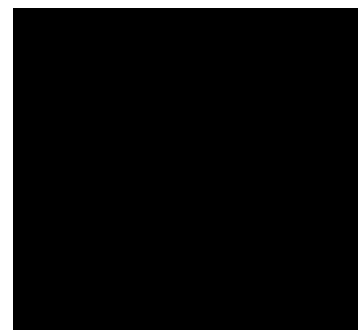

**A65 Display Features**

- 6.5" Sunlight Viewable color display
- High resolution 640 x 480 pixels (VGA)
- RS12 12 Channel GPS receiver
- NMEA 0183 Input and Output
- Plug and Play DSM25 Digital Sounder Module and transducer included
- Ready-to-go Navionics chart coverage for the continental US coastal areas, Great Lakes and the Bahamas on a single CompactFlash card
- 1000 Waypoints and 500 routes with unlimited waypoint and route storage using optional CompactFlash memory card

**A60 Display Features**

- 5.7" Sunlight Viewable color display
- 320 x 240 pixels (QVGA)
- RS12 12 Channel GPS receiver
- NMEA 0183 Input and Output
- Plug and Play DSM25 Digital Sounder Module and Transducer Included
- Ready-to-go Navionics chart coverage for the continental US coastal areas, Great Lakes and the Bahamas on a single CompactFlash card
- 1000 Waypoints and 495 routes with unlimited waypoint and route storage using optional CompactFlash memory card

ORDER NO.	DESCRIPTION	PRICE
RAY E33023	A65 System Pack	\$2059.00
RAY E33027	A60 System Pack	\$1175.00

## Raymarine®

### M260 High Performance In-Hull Transducer Kit

1000 watt capable high performance transducer for in-hull applications for use with DSM 300 Black Box sounder.

**Compatible hull material:** fiberglass

**Max Power:** 1000 W

**Frequency:** 200/50 kHz

The the M260 can "shoot through the hull", and delivers outstanding performance with all the advantages of an in-hull design—no hole in the boat or cavitation to the propeller. The the M260 will read clearly at high speeds, as flow turbulence noise isn't an issue.

ORDER NO.	PRICE
RAY A66089	\$1000.00
