WATERPROOF MARINE AUDIO

Subwoofer with Amplifier

Poly-Planar's 10" MS250 subwoofer is teamed up with a separate water resistant marine audio amplifier that will crank up the required response from the lower registers. This speaker will produce home-quality sound from even the most basic marine stereo system. The compact amplifier that drives this speaker can be mounted remotely for added protection from the elements, or connected directly to the back of the speaker. The MS250 is an omnidirectional speaker meant to be installed almost anywhere there's a wall—bridge, aft deck, salon or cabin.
