The PL-259CPG Connector

Shakespeare's Centerpin® PL 259 connector means no measuring and no critical stripping of coax insulation, no fussing with the coax's braid, no soldering or "tinning." Therefore, no making a mess of it. The PL-259CPG connector (patent pending) makes just as good or better connections as solder-on ones, both to the coax's braid and to its center conductor. For either RG-58 A/U or RG-8/X coax. Gold plated brass for better performance and durability.

Shakespeare

CENTERPIN PL-258-CP

The easy way to splice coax! The Centerpin PL258 CPG connector puts Centerpin convenience to work on the double-trouble task of splicing RG-58 A/U and RG-8/X. Centerpin connectors are solderless, fret-less, and botchless. They go on without a hitch, without soldering skills. No measuring, no critical stripping of coax insulation, no fussing with the coax's braid, and no "tinning." Gold plated brass for better performance and durability.
